YULE TREE FARM

AKELEY, PENNSYLVANIA

PRICE LIST

PHONE: RYUSSELL(PA) 2395

Warren 348

As GROWERS of evergreens and other ornamental nursery stock we give no guarantee as to growth. However, our stock is backed with 21 years' experience and interest; it has been carefully grown, root pruned and sheared, and is offered only in first class condition.

Prices are for trees at the nursery, and include balling and burlapping (B & B) except where noted.

Brief PLANTING INSTRUCTIONS

Evergreens: Plant between Sept. 1 and June 15. Leave burlap on ball, merely loosening at top; water well after filling hole 2/3 full of soil.

Deciduous: While dormant, about Oct. 15 to May 1, dig hole large enough to spread roots fully; fill to 1/2 with soil, water well and after water soaks in tamp soil firmly in remainder of hole.

The HEMLOCK, state tree of Pennsylvania but sometimes unappreciated as a common native, is one of the finest ornamentals cultivated. It thrives in sun or shade and in most soils, and may be sheared into hedges or to almost any size or shape. The Hemlock Arboretum Bulletin No. 3 points out that early botanists classed it in the genus *Pinus*, and not until 1847 was it given its proper family name of *Tsuga* (by Endlicher: 1809-1819).
